

MapGuide Starter Pack £1650

The starter pack is the quickest and easiest way for you to start publishing mapping data on your network or the Web. A Keynetix consultant will visit your site, appraise your data and requirements, install and configure MapGuide and start loading and styling the data. At the end of the two-day consultation you will have a mapping system and your staff should have essential knowledge on how to administer it and be self sufficient in adding new datasets.

Content of Starter Pack:

Two day consultation covering:

- Onsite consultation exploring what spatial data you have and what your requirements are
- Installing MapGuide Enterprise
 - *For evaluation purposes it is possible to install MapGuide on to Windows XP but for long term usage Windows Server 2000 or Windows Server 2003 should be used.*
- Installing MapGuide Studio
 - *MapGuide Studio Requires Windows® XP Professional (SP2) or Windows 2000*
- Training on how to use MapGuide Studio to load and connect data to MapGuide
- Deploying a Website using MapGuide.

MapGuide Studio + one year MapGuide Studio subscription

Typical schedule:

Day 1 AM	Discuss the requirements for your project, investigating your mapping data and what you would like to achieve
Day 1 PM	Installing and configuring MapGuide Server and MapGuide Studio
Day 2 AM	Initial processing of data for loading into MapGuide Studio and styling of map data
Day 2 PM	Creation of Web Layout and website to view data from with in a browser using MapGuide

Additional consulting days can be purchased at £850 per day
